#### About NSN Connect and this document

NSN Connect has been developed to offer secure, quick-and-easy, online remote-access to your irrigation PC from any PC, Mac, iPhone, or Windows Mobile device. This guide offers you a step-by-step description of the installation process.

Contact Toro NSN at 800-ASK-TORO if you need assistance.

Please note that we refer to the following terms when describing how to install and use NSN Connect:

**Remote computer:** any computer being controlled remotely. You can only remotely control computers to which you've previously installed the NSN Connect service.

**Local computer:** any computer used to control a remote computer.

#### System Requirements

<b>Microsoft Windows**</b>	Windows 95, 98, 2000, NT, Me, 2003, XP, Vista, or Windows 7 Internet Explorer 5.0 (or later), Netscape 6.0 (or later) or Firefox 1.0 (or later)
<b>Mac</b>	Mac OS X 10.3.9 (or later) PowerPC or Intel Safari, Firefox, Camino or Netscape
<b>Pocket PC / Windows Mobile</b>	Windows Mobile 5 / 6 (touch screen) or Windows Pocket PC 2003 Internet Explorer for Pocket PC

\*\* The NSN Connect service cannot be installed through a Remote Desktop session.

## Installing NSN Connect on your computer

Installing NSN Connect on your irrigation computer is quick and easy and follows a 2-step guided process.

### Step 1. Start the installation process

Log into your NSN Connect account at [www.nsnconnect.com](http://www.nsnconnect.com). Click on the 'Installation' option (1) from the menu on the left of the screen and follow the instructions shown to the right.

First click on the 'Download' button (2) that appears in the bottom center of the screen then click on 'Run' (3) in the new window that pops up to execute the installer file...

...and the installation process will begin on your computer

You must accept the license agreement. Then click on 'Next'.

Choose the directory into which you want to install the program files then click on 'Next'.

Enter your username and password in the lower part of the screen. If you do not have a username and password, contact Toro NSN at 800-ASK-TORO.

After specifying your account details, you will be asked to define the computer's name (1). This is the name by which your computer will be known in the NSN Connect Control Panel. You can either accept the default name or specify a new one. If you accept the default name, you will still be able to change it later from the Control Panel.

**Settings**  
Step 5 of 7

Enter the name which will identify this computer and a password to allow you access it remotely using NSN Connect.

**Set the computer name (1)** → Name: ABI314MC

Use my user account password by default.  
Your password must be at least 6 characters long.

**Set the access password for this computer (2)** → Password:

Confirm Password:

InstallShield  
VeriSign

< Back    Next >    Cancel

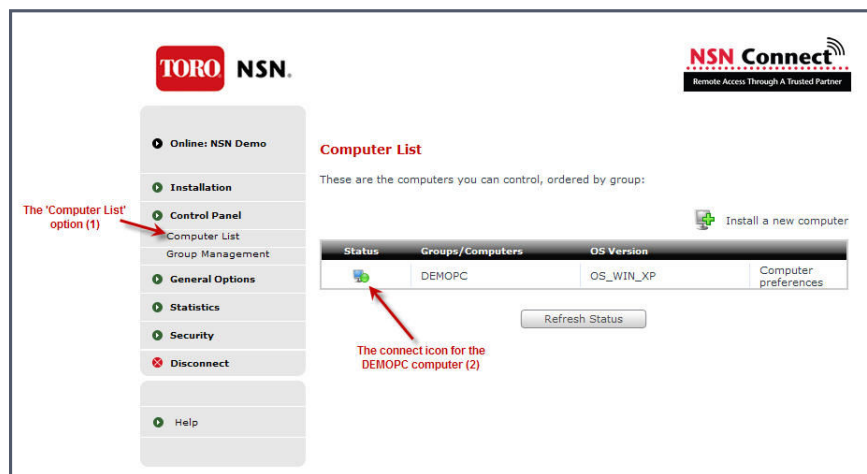

By default, once you've logged on to the NSN Connect service, you will not need to enter a password in order to connect to this computer; however, if you want to use more rigorous security, you can specify that a password (2) must be entered in order to make a connection. To do this you must first uncheck the 'Use my user account password by default' checkbox then set and confirm the password in the boxes below. **The password that you enter will be specific to this computer.**

After clicking on 'Next', you will see the installation progress, and then confirmation that the installation has been completed successfully. Click Finish, and you can now connect remotely from any PC, Mac, or touch screen Windows Mobile device.

## Step 2. Make your computer accessible

Once you've completed the installation, the computer will appear in the 'Computer List' of the Control Panel (1). To be able to remotely control that computer, you only need to leave it switched on and connected to the Internet.

If you leave a computer turned off or not connected to the Internet it will appear in the list with a no-entry icon and you will not be able to connect to it.

## Accessing your irrigation computer

To access your irrigation computer go to [www.nsnconnect.com](http://www.nsnconnect.com) and log in by entering your user name and password in the center of the screen. Once logged in, go to the Control Panel and click on the icon of the computer you want to access.

After clicking on the icon you will see a connecting message; a few seconds later you will see the desktop of the irrigation computer in a window on the local computer.

**UNLOCK THE REMOTE COMPUTER:** If the remote computer is locked you can unlock by choosing the '*Send CTRL + ALT + DEL option*' from the '*Actions*' menu of the floating toolbar displayed at the top center of the window displaying the remote computer's desktop.

You can find more information about NSN Connect by calling Toro NSN at 800-ASK-TORO; or in the quick start and user guides on the NSN Connect website – [www.nsnconnect.com](http://www.nsnconnect.com).
